

# We are sure you will enjoy these great updates!

We are proud to announce the release of our **new system interface and report designs**, to be launched on the 30th of April

At the same time, we will also launch two new services to help improve the administration process for off-site testing (optional):

A **password generator** will be added to produce multiple one-time passwords.

A **personalized corporate screen** will be sent to examinees to verify their passwords and complete testing distantly.
